

CE 10 T

Semiautomatic carton erector . It forms the bottom of uniform size batches of American type boxes with operator. When the carton is filled, the operator presses a button and the machine automatically transfers the carton into a case sealer for top and bottom sealing so that boxes can be easily sent to filling lines by motorized conveyors.

width from 160 to 480 mm

Length from 200 to 600 mm

Height from 120 to 500 mm

Medium production power 300 boxes/hour

Tension V220 mono Hz.50, power Kw.1

Air consumption/cycle 1,5L min a Bar 6

Machine weight 80 kg

Overall layout dimensions L1230/1700xW950xH560/860 mm

Working table height std 560 mm (optional until 860 mm with wheels)
