	OMSTRAP
SM 601 Y	Side – seal equipped automatic strapping machien : Loop ejector Strap tensioning regulation with electromagnetical friction Automatic roll change from the outside Strapping a minute 26 with launch device Sealing point at 675 mm Roller working table adjustable from 435 to 585 mm (strapping from 510 to 660 ) Standard arch 600 x 850 dimensionable if required Strap tensioning from 7 to 70 Kgs. Electronical regulation Use polypropylene strap 9/12 mm. thickness 063 (advised) Disobstruction series RESET Working with pedal or button Inside Strap core 280 mm. (200 mm.if required) Mechanical group and arch completely in steel Control panel located on the operator side Standard voltage 220V monophase/50 Hz./1,2 Kw. Machine dimensions (L x W x H) 1485 x 616 x 1760 mm. Machine weight 220 kg. Safety standard CE Max package weight 100 Kg Minimum package dimension 20 X 130 (W x H)
OPTIONAL SM 601 Y - XLM Arches Pedal Voltage	Side-seal without roller table of support Dimensionable if required with addiction of 200 mm For use on both sides with flying pedal 380 V triphase
