

WM WRAP 2100

Self-propelled manual wrapping machine:

The ideal **system** for companies that need a practical and economical machine offering the possibility of wrapping a small number of pallets of any weight and size per day.

Effortless pallet wrapping solution.

No. 2 electrically powered 24V batteries with automatic battery charging.

The machine is powered by batteries and has an autonomy of 90 minutes of continuous operation for each charge.

(The number of pallets that can be wrapped with each charge will therefore vary according to the size of the pallet itself and the number of revolutions needed for each wrapping).

Minimum size pallet for wrapping 600x600, maximum without limits

Usable pallet wrapping height 2100 mm, overlap of film including pallet

The operation of the **pallet wrapper** is comfortable and does not involve any effort.

The lifting or lowering of the carriage takes place by means of an electric motor with adjustable speed, enabled by the up/down button.

Mechanical clutch for adjustment of the film's tension

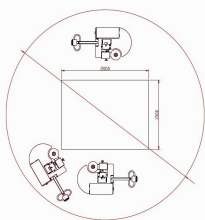

Maximum usable height of the film reel 500 mm diameter 270

OPTIONAL

WM WRAP 2400

Usable pallet wrapping height 2400 mm, overlap of film including pallet

space for revolution around the pallet 700 mm

stop and go carriage speed regulator
