

SM R9 42

SEMI-AUTOMATIC ORBITAL WRAPPING MACHINE MOD. SM R9.42

OPTIONAL

- [Electro-welded steel structure
 - [rotation ring with internal diameter 420 mm
 - [maximum ring speed 90 rpm with inverter-controlled acceleration and deceleration phases
 - [motion transmitted by a belt-driven gear motor
 - [a coil holder with film dispenser is fixed to the rotation ring
 - [operator panel
 - [electrical panel with dedicated card
 - [electrical connection 230V – 1F – 50 Hz
 - [air 6 bar
 - [machine operation by the operator with a foot pedal
 - [usable film **standard 125 mm strip**, internal coil diameter 76 mm, max. external diameter 210 mm.
-
- [gripper/cutting unit consisting of a pneumatic system that grips and cuts the film in a single movement
 - [2 roller conveyors with idler rollers - machine infeed and outfeed - length 300 mm
 - [2 pressers - infeed and outfeed - with manual adjustment
