

WM 2000 A SS inox

Automatic stainless steel wrapping machine closed turntable:

rotating table mm 1500

Maximum load of table **Kg. 2000**

Control digital electrical panel

Soft starting and indexed stop of the turntable

Digital and separate rpm upper and lower adjustment

Wrapping cycles upwards/downwards

Pallet height sensing photocell

Manual and automatic system

Table rotation speed adjustment 0/10 rpm

adjustable speed of the reel film dispenser

Maximum pallet dimensions 1000X1200X2300H

Maximum reel dimensions: diameter mm 300 height mm 500

Film thickness from 12 to 35 micron_ (other thicknesses to be tested)

Dispenser friction roller for adjustment film tension double section

Power supply 220 V single-phase installed power Kw. 1

Power supply system 220 V single thermal magnetic circuit breaker 0,5 ampere for industrial use required

Lateral film reel to wrapping the lower part of the pallet

Weight wrapping machine 600 Kg.

Colors ral blu 5013 grey 9006

Dimensions of wrapping machine 2600X1500X2800H

Packaging dimensions 1650X3000X800H

Wrapping cycle with stop to insert cup

reset start stop on off

Manual control of rotation table

Manual control upward and downward of reel dispenser
