

OMSTRAP

SM 601 L

Equipped automatic strapping machine **low working table : loop ejector**

Strap tensioning regulation with electromagnetical friction

Automatic roll change from the outside

Strapping a minute 26 with launch device

Standard arch 850 x 600 dimensionable if required

Strap tensioning from 7 to 70 Kgs. Electronical regulation

Standard colour grey-blue sealmac

Use polypropylene strap 9/12 mm. thickness 063 (advised)

Working table height standard 410 mm.

Steel working tops with rollers

Disobstruction series RESET

Working with pedal, button or photocell on the working top

Inside strap core 280 mm. (200 mm. if required)

Mechanical group and arch completely in steel

Control panel located on the operator side

Standard voltage 220V monophase/50 Hz./1,2 Kw.

Machine dimensions (L x W x H) 1880 x 620 x 1660 mm.

Machine weight 220 kg.

Safety standard CE

Max package weight 100 Kg

Minimum package dimension 130 X 20 (W x H)

OPTIONAL

SM 601 LS inox

Arches

Double pedal

Voltage

Stainless steel frame SUS 304

Dimensionable if required with addition of 200 mm.

For use on both sides with flying pedal

380 V triphase
